

NPB-70 and NPB-75

Handheld Capnograph/Pulse Oximeter

(Pulse Oximeter on NPB-75 only)

The Powerful Combination of Capnography and Pulse Oximetry in a Handheld Monitor

Two of the most critical respiratory parameters are now available in a format that's smaller, more practical, and more affordable than ever before. The NPB-75 unites end-tidal CO₂ monitoring - including waveform display - with proven Nellcor Puritan Bennett pulse oximetry in a portable, handheld monitor. It gives you the sophistication of a bedside monitor and the convenience of a handheld.

Capnography

NPB-75 & NPB-70

- For mechanically ventilated and spontaneously breathing patients.
- Full-featured capnography previously available only in much larger monitors.
- For use on intubated and nonintubated patients.
- Low sample flow rate of 50 ml/min allows monitoring on the widest range of patients, from neonates to adults.
- Patented Microstream™ technology and versatile range of FilterLine accessories enable CO₂ monitoring even in challenging high-humidity environments.
- Innovative optical bench enhances stable, accurate measurements from a small sample.
- Capnographic waveforms and trends.

Pulse Oximetry NPB-75

- Trusted Nellcor pulse oximetry technology.
- Compatible with complete line of Nellcor adhesive and reusable sensors.
- Graphical trends and plethysmographic waveform.
