

Kowa Portable Slit-Lamp

SL-15

Now, an extra-handy slit-lamp microscope that gives a new degree of unrestricted patient accessibility.

Features:

1. Rechargeable, cordless power supply for slit-lamp examination anywhere.
2. Compact and lightweight, the examiner can hand hold the unit over a long period with minimal fatigue.
3. Light switch is turned on when the examiner grasps the slit-lamp.
4. Extra-bright halogen lamp light source.
5. Easy, simple selection of one of three slit widths or spot illumination.
6. Quick, one-touch selection of 6x or 10x magnification.
7. Built-in blue filter.
8. Stand doubles as a battery recharger.
9. Power supply stand will accommodate recharging of both the slit-lamp and optional extra rechargeable battery.
10. When both the slit lamp and battery are mounted simultaneously the slit-lamp will have charging priority.
