Thermacare[®]

VETERINARY PATIENT WARMING SYSTEM

GAYMAR[®]

Thermacare[®] *safe, effective* *patient warming*

The Thermacare[®] Veterinary Patient Warming System provides multiple benefits in the operating room, during intensive care, and in recovery. Thermacare Quilts offer the following features and benefits:

- Eliminates puncture and water leakage associated with conductive warming
- Does not loft over patients
- Perforated areas for access to patient
- Air distribution designed for optimal effectiveness
- Ample dimensions accommodate all patients
- Hose attaches easily and securely
- Time-saving and convenient set-up
- Soft, “comforter-like” feel
- Adaptable to a wide variety of procedures
- Sturdy, heavy duty quilts resist tearing

The Thermacare system includes a TC3000 Warm Air Blower Unit (CE version TC 3003) and a Thermacare Quilt

Covered Hose

- Flexible
- Easy to use and clean

Warm Air Blower Unit

- Lightweight & portable
- 4 customized temperature settings

Mounting Options

- IV Pole
- THC5 Accessory Stand
